

# **EMERGING STOCKS HIGH GROWTH LOW VALUATION STRATEGY**

This Strategy has quality Microcap Stocks from Nifty Microcap 250 index with high Sales & Profit growth and low valuation.

## **METHODOLOGY**

Multi-factor investing is an investment strategy where you build and manage a portfolio based on multiple factors. Instead of relying on just one style—like "value investing" or "growth investing"—you blend several factors to improve diversification and potentially enhance risk-adjusted returns.

## **Key Factors Commonly Used**

- 1. Value –Stocks trading at low prices relative to fundamentals-like P/E ratio, Future P/E, TTM PEG, Future PEG
- 2. Momentum Stocks with strong recent performance tend to continue doing well
- 3. Quality Stocks with strong balance sheets, stable earnings, and good profitability.
- 4. Market Share Stocks are continuously increasing market share with high sales growth
- 5. Smart Money Domestic and Foreign institutional Investors are continuously buying the stocks
- 6. Basket Nifty Microcap 250

#### How It Works:

Portfolio Construction: Stocks are screened and weighted according to those factor scores.

Diversification: By blending multiple factors, the strategy reduces the risk that any single factor underperforms for too long.
